PROFILE SUMMARY

AWS Certified Cloud Practitioner and Cloud-focused Software Engineer with hands-on experience in AWS infrastructure, including EC2, ALB, and ASG, along with production application deployment using Nginx, PM2. Strong foundation in Linux, Python, SQL and frontend technologies with interest in building scalable cloud-based systems.

TECHNICAL SKILLS

Cloud: AWS EC2, Load Balancer (LB), Auto Scaling Groups (ASG), Amazon RDS, AWS S3, AWS IAM, AWS Lambda, Nginx

Networking: OSI & TCP/IP Models, VPC Network, Subnets, Route Tables, Security Groups, NACLs, Public vs Private IPs

Operating Systems: Linux (Amazon Linux, Ubuntu)

Others: HTML5, CSS3, Bootstrap, Python

PROJECTS

CI/CD Pipeline Automation on AWS using Jenkins, Terraform, and GitHub | June 2026 | [GitHub](#)

- Built and automated a CI/CD pipeline for a Student Management Web Application using Jenkins, Terraform, GitHub, and AWS services, enabling streamlined software delivery.
- Configured and managed Jenkins Pipelines integrated with GitHub and Maven to automate source code retrieval, application build, packaging, and deployment processes.
- Implemented AWS infrastructure using EC2, RDS, and S3, providing scalable application hosting, secure database management, and centralized Terraform state storage through end-to-end automation.

Cloud-Based Node.js Application Deployment on AWS with Nginx & RDS | May 2025 | [GitHub](#)

- Designed a three-tier cloud architecture on AWS using EC2, Nginx, Node.js, and RDS to deploy a production-ready web application following industry best practices.
- Implemented Nginx as a reverse proxy and PM2 as a process manager to handle frontend traffic, backend APIs, and ensure application availability.
- Secured database access by integrating AWS RDS (MySQL) with private connectivity and environment variables, preventing direct public exposure.

AWS 3-Tier Architecture Deployment with High Availability (2 AZ) | Apr 2026 | [GitHub](#)

- Built and deployed a 3-tier AWS architecture using VPC, public and private subnets, Internet Gateway, and NAT Gateway across two Availability Zones to achieve high availability and network isolation.
- Provisioned and managed Application Load Balancers and Auto Scaling Groups for NGINX frontend and PHP backend EC2 instances, enabling scalable and fault-tolerant application delivery.
- Integrated and maintained Amazon RDS MySQL within private subnets using security groups and DB subnet groups to ensure secure and reliable data storage.

INTERNSHIP EXPERIENCE

CRAVITA Technology – Intern | Mar 2026 – Sept 2026

- Worked with AWS services such as EC2, S3, IAM, VPC, and Load Balancer to support cloud infrastructure and application deployment.
- Assisted in Linux server administration, monitoring, troubleshoot, and maintaining cloud-based environments.
- Collaborated on AWS and DevOps projects, gaining hands-on experience in cloud security, networking, and deployment processes.

EDUCATION

- B.TECH – Computer Science**, Padmabhooshan Vasantraodada Patil Institute of Technology, Sangli | (2022–2026)
- 12th – Science**, Willingdon College Sangli | 2021 – 2022
- 10th – H.H.R.C Patwardhan High School**, Sangli | 2019 – 2020

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services (2026)
